St. George Island FL*

Mike Parrish has been doing work around our house for at least 8 years. When I asked my wife what projects she remembered she said "anything we wanted", and that is literally true; crown molding, wall to wall bookcases in two rooms, a kitchen island with butcher block top, fireplace mantle, wet bar, replaced 8' sliding glass door, oversaw installation of granite counter tops with new sink, repaired storm shutters, built a 12'X24' pergola and many others. Mike certainly Lives up to the motto of "no job too large or too small." Obviously, my wife and I have been very pleased with the quality and creativity of his craftsmanship, being an engineer my self quality of work is very important to me. Mike and his crew exhibit the kind of skill, honesty and integrity that make it easy for my wife and me to give them our highest endorsement.
